

Here's what makes Hannay Reels the industry choice:

Multi-position roller assembly features dual arms to give maximum support from each side

Drums are 304-grade stainless steel for maximum corrosion resistance

Sealed axle bearings provide superior wear and effortless operation

Heavy 14-gage disc has rolled edges that add rigidity and strength

One-piece hub assembly for superior strength

Externally mounted spring motor and ratchet pawl lock for the most serviceable reel available

11-gage steel modular frame bolts easily to standard footprint patterns
